

Quality, Occupational Health, Safety and Environment Policy

We at Tufropes Group are committed to manufacture, dispatch of synthetic Ropes, Twine, Nets and article and strived hard for exceeding all key stakeholder expectation by incorporating their requirements as part of our business and enhancing customer satisfaction all the time.

We are committed to provide world-class product by continual improvement in all our processes, product and management system to deliver solution of highest value, thereby providing competitive advantage to our customers and attain injury free and environmentally compliant workplace.

We shall accomplish our commitment through:

- Providing safe, healthy, incident free workplace and adequate resource to all our employees, contract labours, contractors, transporters and external source providers and other business partners.
- Preventing pollutions and minimising adverse impact of our process and products on the environment.
- Consider product safety as one of the prime requirements and ensuring compliance to all applicable legal and other requirements based on the context.
- Set objective as indicators of excellence, monitor progress and continually improve performance.
- Assess risks in our activities by hazard identification and elimination, considering context of the organisation through consultation and participation of workers and workers representatives; provide controls for Quality, Health, Safety and Environment.
- We are committed to sustainable resource use, climate change mitigation and protection of biodiversity and ecosystem, this is in line with ESG (Environmental, social & Governance) as prime area and opportunity for green initiatives.
- Identify and adopt and climate conscious behaviour and processes in our operations.
- Spreading management system awareness amongst our stakeholders, interested parties.
- Continual improvement of our QHSE performance by reviewing policy periodically.
